C EUR Distribution (NL0015530189)

ABN AMRO Aegon Global Impact Equities is authorised in the Netherlands and regulated by the Dutch Authority for the Financial Markets (AFM).

This product is managed by ABN AMRO Investment Solutions, an investment management company of the ABN Amro Group, which is authorised in France and supervised by the Autorité des Marchés Financiers (AMF). For more information on this product, please refer to www.abnamroinvestmentsolutions.com or call +33156219612

Accurate as of: 5 February 2024

What is this product?

Type

This product is an investment fund.

Term

The Fund is established for an unlimited duration, with the possibility for the Board of Directors to decide the termination of the Fund at its sole discretion.

Objectives

The Fund seeks to increase the value of its assets over the long term by investing predominantly in transferable equity securities such as equities, other equity shares such as co-operative shares and participation certificates issued by, or warrants on transferable equity securities of, companies which are domiciled worldwide and which generate measurable socio-economic or environmental benefits, without any specific restriction on tracking error.

Selection of investments will rely on a combination of financial criteria, as well as Environmental, Social & Governance criteria. The Fund contributes to environmental and social objectives and qualifies as an investment product in accordance with article 9 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector. The sub-fund follows a multi-thematic sustainable investment strategy that encompasses sustainability objectives in line with the UN Sustainable Development Goals (SDGs). The selection process combines numerous approaches such as ESG rating, an exclusion filters and a best in class. The purpose of exclusion filters is to exclude (i) companies and activities that might have a negative effect on society or environment, (ii) companies involved in severe human rights violation and environmental damage and finally, (iii) some activities that are deemed in oppressive regimes. While the selectivity approach uses sustainability criteria to identify companies that better manage their ESG risk score than their peer group average and that offer positive impact solutions to contribute to SDG's achievements. This ESG risk score is provided by Sustainalytics and evaluates Companies on Material ESG Issues (MEI) based on 20 criterias. The portfolio will be composed of issuers which are positively exposed to one or more themes such as (i) ensuring health, (ii) alleviating poverty, (iii) delivering education, (iv) optimizing material use, (v) mitigating climate change, (vi) contributing to sustainable energy use, (vii) conserving water. The sub-fund seeks to achieve positive environmental impact by investing primarily in companies that are leading the way to a zero-carbon economy and have either an approved "Science-Based Target initiative" (SBTi) emissions reduction plan, an ambitious carbon reduction plan, or are working towards a carbon reduction plan.

The Fund applies the "Do Not Significantly Harm (DNSH) any other environmental or social objective" principle and integrates sustainability risk as introduced by the Regulation. The resulting ESG characteristics of the Fund will be higher than the reference index and that the initial investment universe is at least reduced by 20% after implementation of the sustainability criteria. Methodological limitations can be assessed in terms of: nature of ESG information (quantification of qualitative data), ESG coverage (some data are not available for certain issuers) and homogeneity of ESG data (methodological differences).

The minimum asset allocation in such securities on a consolidated basis (direct and indirect investments) will be of 60% of the Fund's net assets (after deduction of the Fund's cash). Moreover, the minimum ownership in equity securities will be of 75% of the Fund's net assets.

Investments in debt securities do not exceed 10% of its net assets.

The Fund may invest for maximum 10% of its net assets in funds that have been selected in accordance with a number of qualitative and quantitative criteria.

This Fund is actively managed and is compared to the MSCI World TR Net for performance and risk level indicator purposes. However, the reference to this index does not constitute any objective or limitation in the management and composition of the portfolio and the Fund does not restrain its universe to the index components. The index does not evaluate or include its constituents on the basis of environmental and/or social characteristics and is therefore not aligned with the ESG characteristics promoted by the Fund.

Therefore returns may deviate materially from the performance of the reference index.

The base currency of the Fund is EUR.

The unit is a distribution unit. Dividends will be paid annually.

Investors are able to redeem on a daily basis (on Netherlands bank business days).

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Practical information

Custodian Bank State Street Bank International GmbH, Amsterdam Branch.

Further information Further information about the Fund, the prospectus and the latest annual and semi-annual report may be obtained free of

charge, in English, from the Management Company, the local agents or online at www.abnamroinvestmentsolutions.com.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between July 2021 and July 2022.

Moderate: this type of scenario occurred for an investment between February 2014 and February 2019.

Favourable: this type of scenario occurred for an investment between October 2012 and October 2017.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of ABN AMRO Investment Solutions to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.abnamroinvestmentsolutions.com.

Recommended holding period		5 years	
Example Investment		10,000 EUR	
Scenarios		if you exit after 1 year	if you exit after 5 years (recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs Average return each year	4,970 EUR -50.3%	3,860 EUR -17.3%
Unfavourable	What you might get back after costs Average return each year	8,470 EUR -15.3%	9,250 EUR -1.6%
Moderate	What you might get back after costs Average return each year	10,430 EUR 4.3%	15,650 EUR 9.4%
Favourable	What you might get back after costs Average return each year	13,410 EUR 34.1%	18,080 EUR 12.6%

What happens if ABN AMRO FGR ABN AMRO Aegon Global Impact Equities is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should we default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	658 EUR	890 EUR
Annual cost impact*	6.5%	2.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.1% before costs and 9.4% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering this investment.	Up to 500 EUR
Exit costs	1.00% of your investment before it is paid out to you.	100 EUR
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
Management fees and other administrative or operating costs	0.41% of the value of your investment per year. This is an estimate based on actual costs over the last year.	41 EUR
Transaction costs	0.17% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	17 EUR
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product is designed for longer term investments; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty at any time during this period, or hold the investment longer. Redemptions are possible on every bank business day in Luxembourg; it will take 2 working days for you to be paid. The price for the day, reflecting the actual value of the fund, is set each day at noon, and published on our website www.abnamroinvestmentsolutions.com.

How can I complain?

You can send your complaint to the fund's management company at 119-121 boulevard Haussmann, 75008 Paris, France or by e-mail to aais.contact@fr.abnamro.com.

If you have a complaint about the person that advised you about this product, or who sold it to you, they will tell you where to complain.

Other relevant information

Cost, performance and risk The cost, performance and risk calculations included in this key information document follow the methodology prescribed by EU rules. Note that the performance scenarios calculated above are derived exclusively from the past performance of the Company's share price and that past performance is not a guide to future returns. Therefore, your investment may be at risk and you may not get back the returns illustrated. Investors should not base their investment decisions solely upon the scenarios shown.

Performance scenarios You can find previous performance scenarios updated on a monthly basis at www.abnamroinvestmentsolutions.com.

Past performance You can download the past performance over the last 1 years from our website at www.abnamroinvestmentsolutions.com.

Additional information Further information about the Fund, the prospectus and the latest annual and semi-annual report may be obtained free of charge, in English, from the Management Company, the local agents or online at www.abnamroinvestmentsolutions.com.
